

Environment Policy Statement

BMT WBM conducts its business in a manner which is compatible with the balanced environmental and economic needs of the clients which whom we work and the broader community of which we are a part. BMT WBM maintains an environmental management system as part of an Integrated Management System that meets ISO 14001:2015 requirements and complies with all relevant environmental regulations.

BMT WBM is committed to continual efforts to improve environmental performance through both prevention of environmental harm and implementation of environmental improvement initiatives. We embrace our duty of care towards the environment and emphasis each employee's responsibility in this regard.

This commitment will be met through the following:

- Requiring consideration of environmental aspects associated with delivery of services and scoping activities to meet or exceed best industry practice for environmental management.
- Monitoring and controlling power and water consumption and generation of waste.
- Ensuring personnel are aware of their duty of care and encouraging a respect towards the environment.
- Immediately responding to and reporting instances of environmental harm.
- Complying with environmental and heritage legislation.

BMT WBM will also seek to influence broader environmental outcomes within the industries in which we work by providing consulting advice consistent with industry best practice and expectations.
